

Security Analyst: For better informed decision making

Data Security

Balance your Security Posture

Vulnerabilities discovered in your infrastructure are not just unwanted technical challenges; depending on their context to your business, you must make decisions and take action!

This is how the „audius Security Analyst“ service evolved from real-world projects – the catalyst helping to make the right choice.

As an extension of your team, our flexible approach covers the „grey areas“ often overlooked by traditional SIEM and SOC solutions. By leveraging our expertise, your teams can focus on business-critical projects, driving your business forward.

What makes the „audius Security Analyst“ service unique?

- **Comprehensive vulnerability scans:** a regular collection of limitations in your infrastructure.
- **Tailored criticality ratings for strategic risk assessment:** based on the potential impact on your business.
- **Actionable delta reports and trend analysis:** receive strategic recommendations with historical security posture reference.
- **Entropy-based approach:** cutting through the noise, we tackle and simplify data overwhelm for you.

How does audius stand out?

- **We listen and understand** your requirements, establishing a focused scope and eliminating wasted efforts and budget.
- **We act as a trusted advisor for all:** from start-ups to high-demand market-leading companies across all sectors.
- **We help build an achievable roadmap** that gives tangible results for your business.

Benefits for you: Better-informed Decision Making.

- **Better-informed decision making:** proactively identify and evaluate threats through regular testing, enhance awareness, and receive expert insights for strategic security enhancements.
- **More attainable and cost-effective solution:** balancing affordability and delivering valuable output/results. There are no additional costs for scanners with quarterly service on small and medium-sized infrastructures, allowing you to allocate resources efficiently and achieve a strong return on investment.
- **Timely support:** our responsive team – no artificial intelligence - ensures prompt resolution of individual queries, providing the help you need when needed.
- **Compliance assurance:** ensure compliance with industry regulations and standards, mitigating potential legal consequences.

 Our service culminates from decades of experience, state-of-the-art technologies, certified quality management, and award-winning innovations. But in the end, it boils down to our ability to listen – „Erfolg durch Zuhören“ – „success through listening“, as our motto has it.
